THE ROLE OF METABOLISM IN PREVENTING DISEASE

Please join us for an evening of cocktails and discussion featuring:

Professor Atan Gross, Ph.D.

The Marketa & Frederick Alexander Professorial Chair
Department of Biological Regulation
Weizmann Institute of Science

Professor Kevan Herold, MD

Professor, Department of Immunobiology &
Department of Internal Medicine [Endocrinology]
Director, Yale Diabetes Center
Yale School of Medicine

Professor Anthony T. Vella, Ph.D.

Professor and Boehringer Ingelheim Chair in Immunology
Associate Dean of Research Mentoring and Career Development
University of Connecticut

Professor George Weinstock, Ph.D.

Professor and Evin Family Chair
Director of Microbial Genomics
The Jackson Laboratory

Please RSVP at <http://s.uconn.edu/4ej> by October 16, 2018.

Questions? Please contact Jennifer Grey at

JGrey@foundation.uconn.edu or call 888.822.5861.

The Jackson Laboratory • University of Connecticut
Weizmann Institute of Science • Yale University

The Metabolic Research Alliance (MRA) is a consortium consisting of the Jackson Laboratory, University of Connecticut, Weizmann Institute of Science and Yale University. The primary goal of the Alliance is to take advantage of the inter-disciplinary strengths of the partner institutions for transformative research into metabolic diseases, especially pertaining to diabetes (T1D and T2D) and obesity, as well as the impact on cancers. Our consortium is distinctly positioned to provide synergistic research expertise in the areas of immunobiology, cell biology, genomics/genetics and microbiome, which could lead to prevention, treatment and curative approaches to these devastating diseases.
